

Getting the help you need.

Amelia Rehabilitation and Healthcare Center, with nearby rolling meadows and fence-lined pastures, overlooks the natural beauty of Amelia County. Conveniently located 30 miles southwest of Richmond, our residents remain connected to family and friends and maintain life-long ties with the people they love. We offer skilled nursing care and extensive rehabilitation services for residents who are unable to immediately return home following a hospital stay for illness, injury or surgery. We provide care that allows our residents to recover and return home. We strive to meet all of our residents' physical, intellectual, emotional and spiritual needs. We offer both private and semi-private rooms.

REHABILITATION & HEALTHCARE CENTER

Rehabilitation Services

Our Rehabilitation Services team works hard to help patients resume independent living. Physical therapists, occupational therapists and speech therapists work closely with other members of the medical team to ensure that each patient receives the highest quality medical care and experiences a comfortable and enjoyable stay which hastens their recovery.

Therapists

The therapists at Amelia Nursing and Rehabilitation Center have completed intensive clinical training and attend continuing education courses. They are qualified to treat orthopedic, neurological and general medical or surgical conditions. Many times we can help the patient return home, but if this is not possible, then we work with the patient's family to situate the patient in the most appropriate care setting.

Nursing Staff

Our professional nursing staff promotes individual choice and family involvement in patient care. Licensed nursing care is available 24-hours every day and provides the highest quality of skilled nursing care. Certified nursing assistants assist with bathing, feeding, dressing, personal care and assist our residents in staying as mobile as possible. Our friendly staff works well together and takes great pride in making residents feel at home.

Individual therapies working together.

Our therapies work together and emphasize the different living skills:

PHYSICAL THERAPISTS

Physical therapists work with the residents on walking, balance, endurance, strength, wound care and pain management.

OCCUPATIONAL THERAPISTS

Occupational Therapists focus on activities of daily living, retraining residents who need to relearn how to perform routine tasks such as dressing and grooming. They also help in proper patient positioning and provide splints.

SPEECH & LANGUAGE PATHOLOGISTS

Speech and Language Pathologists help residents to regain their ability to communicate their needs and thoughts and to safely swallow foods and beverages.

We mark the season with a senior prom, a summer luau, resident Olympics, fifties day, holiday parties and an annual resident horse show and picnic. Community volunteers often drop by to sing and perform, talk and visit or conduct worship services for our residents.

We serve three nutritious meals and snacks throughout the day for residents. Menus include traditional southern cooking as well as continental and international cuisine.

A registered dietitian is on staff and available for special consultations. We take great pleasure in making cakes, special dishes and elaborate buffets for our resident activities. We work with the medical team to provide special diets for those who need them.
